Job Description

- Work with universities Information Systems and Technology teams to maintain and upgrade server infrastructure or database platforms as necessary

**Custom report development and data analysis**
- Conduct end user interviews and analysis to develop specifications for reporting or report modifications
- Design and develop custom reports through custom programming, department report writing tools, business intelligence or data visualization tools
- Use department business intelligence tools (such as SSRS and SSAS) to develop advanced reporting using data warehouses or analytical OLAP cubes
- Perform data analysis on department donor databases to support business unit programs, projects and business program reporting
- Where appropriate, work with Report Developers to create reports based on specifications developed

**Projects, requests and operational tasks**
- Participate and/or lead system or department projects that may include performing assigned project tasks, project planning, documenting, communicating, scheduling, organizing or attending meetings
- Participate in acquisition and implementation of new computer systems or software, including product research, product demonstrations and RFP development
- Complete departmental requests and ongoing operational tasks that include; data extracts, data cleanup, database coding, data exchange, reporting and technical support

**Other Duties**
- Backup resource to other team members where appropriate
- Provide general technical support for departments computing environment as required
- Provide direction for work-study or Coop students as required
- Other tasks and responsibilities as assigned

**Required Qualifications**

**Education**
- A University degree or College diploma preferably in computer science, software engineering, software development or a related information technology area of study.

**Experience**
- 7+ years extensive experience developing software applications and/or full stack development using software development methodologies (SDM) and practices such as prototyping, rapid application design, agile or waterfall for system architecture, with experience conducting requirements gathering, testing and code design
- 5+ years experience developing .Net based windows or client/server applications using Microsoft Visual Studio and using VB .net or C# .net programming language and/or experience developing web based applications using ASP .Net / MVC architecture, HTML, CSS and JavaScript
- Experience designing and maintaining SQL databases, such as Microsoft SQL Server and Access databases and using database tools such as SSIS
- Experience developing Extract Transform and Load scripts (ETLs) for data migration would be an asset
- Experience developing custom reports programmatically or using report-writing tools, such as SSRS
- Experience developing web applications or supporting Windows or Linux Server operating system platforms would be an asset using current web programming languages
- Proven experience documenting requirements, functional specifications, test results and processes
Job Description

- Experience providing technical support for Microsoft Windows operating systems, the desktop environment, Intel based PC hardware, Linux OS and networking would be an asset
- Experience working with higher education institutions and/or fund raising donor databases would be an asset

**Knowledge/Skills/Abilities**
- Strong interpersonal, organizational, communication, analytical and problem solving skills
- Ability to handle multiple tasks, and work in teams or independently
- VB.net or C#.net with Microsoft Visual Studio to develop Windows Forms / WCF or web based forms
- Basic web development using HTML, CSS, JavaScript, JQuery and knowledge of SOAP or REST APIs
- Microsoft SQL Server (2012 or newer) database development, Microsoft Access, SQL management studio, T-SQL query language (or similar) and XML
- Microsoft SSIS (integration services) for data and ETL’s
- SQL server reporting services (SSRS)
- Microsoft Windows 7/10 operating system and Microsoft Office Suites of products
- ASP .Net and MVC architecture would be an asset.
- Red Hat Linux OS, Microsoft Windows Server 2012, PHP, Python, PERL. MySQL and PostgreSQL databases would be an asset
- Experience with Blackbaud’s Raisers Edge Enterprise, iModules EnCompass, Crystal Reports 11, Drupal, Confluence, GIT or MS Team Foundation would be an asset

**Nature and Scope**

- **Contacts:** The position will work collaboratively with team members, individual staff and/or teams within the broader Office of Advancement (i.e. faculties, colleges or departments). They will interact closely with department staff during requirements gathering, testing or completing assignments. As needed, they will also work with individuals or teams outside the department, such as IST, to complete tasks or participate on various projects as assigned.

- **Level of Responsibility:** The position is responsible for software development activities including requirements gathering, systems analysis, database development, custom reporting and programming solutions for a desktop, client-server or web environment. The position is specialized with minimal supervision and is required to complete assigned requests, operational tasks, project tasks and other technical support tasks. The position may also play a lead or significant role in execution of new projects. The role is required to report issues or status to the Associate Director, Systems as needed, participate in team oriented meetings and activities.

- **Decision-Making Authority:** The position is specialized and is required to make independent decisions regarding completion of tasks within their scope of expertise, assigned tasks or project related work. Where appropriate, the position will consult and/or defer decisions to their direct manager or appropriate colleagues.

- **Physical and Sensory Demands:** The incumbent will be exposed to extensive sitting, and possible distractions in an open concept work area. They will need to be focused on attention to detail in many of their tasks.

- **Working Environment:** This role is situated in a comfortable office environment with some distractions due to the open concept nature of the office. Some travel to other buildings on campus may be required.
